2. An artificial channel or conduit, now usually covered and underground, for carrying off and discharging waste water and the refuse from houses and towns. *Common sewer*: a drain through which all or a large part of the sewage of a town passes, a main drain collecting and discharging the contents of auxiliary drains. Cf. SHORE *sb.*[2]

The development of this sense (*c* 1600) is prob. due to the fact that the drainage of towns near tidal rivers had come under the control of the commissioners of sewers. See Act 3 Jas. I, c. 14 (1606).

Technically, 'sewer' is distinguished from 'drain', the latter being restricted to channels used 'for the Drainage of one Building only or Premises within the same Curtilage' (Act. 11 & 12 Vict. c. 112 § 147).

II, c. 8 (1667), and were invested with the title and jurisdiction of commissioners of sewers by the Act 7 Anne, c. 32 (1708).

The term 'Commission of Sewers' (AF. *Commission de Sewerys, de Sewers*) occurs first in 1427 (Rolls of Parlt. IV. 333/1 and Act 6 Hen. V, c. 5), but the issue of similar commissions is recorded in 1314 (Rolls of Parlt. I. 319/1) and in 1322 (Placit. Abbrev. 339/1).

[*Note.*—In the collocations 'Commission of sewers', 'works of sewers', etc, the word had virtually a much wider meaning than sense 1 above; it practically denotes any means of defence against inundation from the sea. The formula enumerating the things placed under the control of the commissioners begins with 'walls' (1322 more fully 'sea-walls', *murorum maritimorum*) and mentions 'sewers' only in the fifth or sixth place. This had already attracted the attention of lawyers early in the 17th c.; in 1622 Callis (*Stat. Sewers*, ed. 1647, p. 57) states that 'some compound the word of *sea* and *were*' (=Wer, defence). Although sense 1 is certainly genuine, and the etymology stated at the head of this article is well established, it seems not impossible that there may have been some early confusion with a native compound of the formation suggested by the writers referred to by Callis. No instance of OE. **sǽ-wer*, however, is known; a (? plural) *sǽ-wæra*, of obscure meaning, occurs A.D. 1045 (Kemble *Cod. Dipl.* No. 776): 'Se ixxað æt portes bricge & healfe sæ-wære & se mylnstede æt Mannæs bricge.' The Anglo-Latin derived verb *sewerare* (1314 in *Rolls of Parlt.* I. 319/1) appears to mean 'to protect from flood'.

The pseudo-etymological spelling *seward* (quot. 1623 in 3) is noteworthy. Skinner (Etymol. 1671, s. v.) erroneously attributes to Minsheu the statement that the word 'was formerly written *seward*, perhaps from *seaward*, either because they [*sc.* sewers] are made towards the sea, or because they ward off the sea'.]

SH, a consonantal digraph representing the simple sound (ʃ). In late OE. this sound was represented by the combination *sc*, which retained its original phonetic value (sk) only in words of foreign origin. The sound (ʃ) did not exist in early OF., and hence the early ME. texts, written by French-educated scribes, show great diversity of attempts to find expression for it. The OE. notation by *sc* became rare after the 12th c. Some scribes of the 12–13th c. used the single *s* initially and finally. More frequent was *ss* (used in all positions), which is found as late as 1340 (*Ayenbite*). In medial and final positions *ssh* was common from the 13th to the 16th c.; Coverdale (1535) has frequently *szsh*, sometimes *szh* (but also often *sh*). The prevailing form from the end of the 12th c. to the end of the 14th c. was *sch* (initially; in other positions it was less frequent); in the north it was common down to the end of the 16th c. In the 13th c. we occasionally find *sge, sȝe, sze* for *she* (rarely *sȝ* or *sz* in other words), and in the 14–15th c. some East Anglian scribes wrote *xal, xulde* for *shall, should*. In ME. texts the suffix *-ship* is often written *-chipe*, and sometimes *ch* occurs as the symbol of (ʃ) in other positions.

The combination *sh* (probably to be regarded as a simplification of *sch*) is regularly used in the *Ormulum* *c* 1200 and frequently in the *Trinity College Homilies* of about the same date. It is the usual symbol in the London documents of the 14th c. and in the MSS. of Chaucer, and from the time of Caxton onwards it has been the established notation for (ʃ) in all words except those which (as *machine, schedule, Asia*, the derivatives in *-tion*, etc.) are spelt unphonetically on etymological grounds.

In some compounds as *dishonest, mishap, Gateshead, s* and *h* come together without forming a digraph. The pronunciation of some proper names in which this sequence occurs has been affected by misinterpretation of the spelling; e.g. Evesham is often called (*ī·vʃăm*), Petersham (*pī·təɹʃăm*).

b. *Shadow of death*: a Biblical expression (= LXX and N.T. *σκιὰ θανάτου*, Vulg. *umbra mortis*) embodying an ancient interpretation of Heb. צלמות, traditionally vocalized *ṣalmā veth*, as if f. *ṣēl* shadow + *mā·veth* death.

Ewald and many other scholars, however, think the word should be pronounced *ṣalmūth* (or as pl. *ṣēlmōth* = Arab. *ẓalamāt*), and that it comes from the Semitic root found in Arab. as ظلم *ẓalima* to be dark. However this may be, it is in the Old Testament merely a poetic word for intense darkness (so the margin of the Revised Version, 'deep darkness'). But the phrase 'shadow of death' has (in Eng. as in Christian Latin and other langs.) often been used with various meanings naturally suggested by the words; the commonest use is to denote the gloom and horror of approaching dissolution.

The valley of the shadow of death (Ps. xxiii. 4 in Eng. versions from Coverdale 1535; the earlier versions follow the Vulg. and LXX, which read 'midst' instead of 'valley'): often applied to the experience of being brought by illness apparently near to the grave.

The Land of the Shadow of Death: a rhetorical name for a tract of Western Africa in which the mortality among the white inhabitants is very great.

LG. *schacht* (also Du.) of the same meaning, usually regarded as a specific application of *schacht* = SHAFT *sb.*2, the primitive notion being that of something cylindrical. It is possible, however, that the type **skafto-* represented by LG. *schacht*, Eng. *shaft* 'pit-hole', may be a separate formation on the Teut. root **skab-* of SHAVE *v.*, in its original sense to dig (cf. Gr. *σκάπτειν*). On either of these views, it is doubtful whether *shaft* 'pit-hole' goes back to OE. (though not recorded before the 15th c.), or was introduced into England by foreign miners.

Some scholars still adhere to the view of Grimm, that the HG. *schacht* (and LG. *schacht* in this sense) represent a Teut type **skaχto-z*. On this supposition the Eng. word would necessarily be a loan word from the continent. Grimm's hypothesis is formally possible, but leaves the ultimate etymology obscure, as the suggested connexion with the root **skab-* SHAKE *v.* is semasiologically improbable.]

There is no sufficient reason for the common view that it is a. Shall (ʃæl), *sb.* [f. SHALL *v.*]

1. An utterance of the word 'shall'; a command, promise, or determination (such as is expressed by means of 'shall').

It is doubtful whether quots. 1553 and 1608 belong to this word or to SHALK *sb.*[1] Quots. 1566 and 1593 imply the existence of a punning phrase *to feed* or *serve with shalls* (*shales*).

1553 *Respublica* (Brandl) III. iii. 90 *Adul.* Ye shall prove att length by theffecte yᵗ shall ensue. *Peop.* Nai, and we shall alwaie bee serued but with shales, than chil beleve een still yᵗ vaire woordes beeth but tales. 1566 ASCHAM *Let.* in Harington *Nugæ Antiq.* (1804) I. 101 As now another man shall enjoye the sweet kirnell of this hard and chardgeable nutt, which I have bene so long in cracking; and nothing left unto me but shells and shalls to feed me with all. 1593 CHURCHYARD *Challenge* 153 Y ȝ, You shall haue Nuts, they say when ploms are ripe. 2. The word 'shall' as idiomatically used in contradistinction to 'will'.

Shall (ʃæl, *unstressed* ʃəl, ʃ'l). Pa. t. **should** (ʃud, ʃəd). Forms: see below. [A Com. Teut. preterite-present strong verb: OE. *sceal, sculon, sc(e)olde* = OFris. *skil* (*skel, scol*), *skilun* (*skalun*, etc.), *skolde* (*sculde*, etc.), OS. *skal, skulun, skolda*, OLow Frankish *sal, sulum, solde* (MDu. *sal, sullen, solde*, mod.Du. *zal, zullen, zou*), OHG. *scal, sculun, scolta*, also *sal* (*sol*), *sulun, solta* (MHG. *schal* and *schol, schulen, scholte*, also *sal* and *sol, sulen, solte*; mod.G. *soll, sollen, sollte*), ON. *skal, skulu, skylda* (Sw. *skall*, pa. t. *skulle*; Da. *skal*, pa. t. *skulde*), Goth. *skal, skulum, skulda*. The Teut. root (**skel-*:) **skal-* : **skul-* to owe (:—pre-Teut. **skel-*: **skol-*: **sk'l*) is represented by Goth. *skula*, OHG., OS. *scolo*, OE. *gescola* wk. masc., debtor, OHG. *sculd, sculda* (mod.G. *schuld*), OS. *sculd*, OE. *scyld* fem., debt, guilt. Outside Teut. the only certain cognates are Lith. *skelti* to be guilty, *skilti* to get into debt, *skolà* debt, guilt, OPrussian *skallisman* (acc.) duty, *skallûnts* guilty, *po-skulit* to admonish.

The northern English dialects (including Sc.) have a form *sal*, pa. t. *suld*, with initial *s* instead of *sh*. This does not occur in the remains of ONorthumbrian, but first appears in the 13th c. It is remarkable that a similar form, with *s* irregularly representing OTeut. *sh*, existed as a dialectal variant in OHG. (*sal, sol, sulun*) and OFris. (*sal, sel*), and has ousted the regular form in Ger. (*soll, sollen*) and Du. (*zal, zou*). Some scholars regard the *s* form as representing an OTeut. variant, originating from the euphonic dropping of *h* in inflexional forms like the subjunctive **skih-*. It seems more probable that it was independently developed in the different dialects at an early period, while the *sh*-retained its original pronunciation; in stressless position the *h* might naturally be dropped, and the simplified initial afterwards extended by analogy to the stressed use.

In Eng. the vb. has no inf. or pples. (the evidence of an OE. inf. *sculan, scealan*, is doubtful). Some of the other Teut. langs. have an infinitive: OHG. *scolan, solan* (MHG., mod.G. *sollen*), MDu. *sullen* (Du. *zullen*), ON. *skulu* (pa. t. inf. *skyldu*); Goth. has the pres. pple. *skuland-s* and the pa. pple. *skuld-s*; OHG. has the pres. pple. *scolanti* (mod.G. *sollend*), and early mod G. the pa. pple. *gesollt*; ON. has a ppl. adj. *skyld-r* bound by duty.]

8. As a mere auxiliary, forming (with present infinitive) the future, and (with perfect infinitive) the future perfect tense.

In OE. the notion of the future tense was ordinarily expressed by the present tense. To prevent ambiguity, *wile* (will) was not unfrequently used as a future auxiliary, sometimes retaining no trace of its original sense. On the other hand, *sceal* (shall) even when rendering a Latin future, can hardly be said to have been ever a mere tense-sign in OE.; it always expressed something of its original notion of obligation or necessity. In ME. the present early ceased to be commonly employed in futural sense, and the future was expressed by either *shall* or *will*, the former being much more common. The usage as to the choice between the two auxiliaries has varied from time to time; since the middle of the 17th c. the general rule (subject to various exceptions) has been that mere futurity is expressed in the first person by *shall*, in the second and third by *will*. In indirectly reported speech, usage permits either the retention of the auxiliary used by the original speaker or the substitution of that which is appropriate to the point of view of the person reporting.

a. In OE. *sceal*, while retaining its primary sense, served as a tense-sign in announcing a future event as fated or divinely decreed. Hence *shall* has

always been the auxiliary used, in all persons, for prophetic or oracular announcements of the future, and for solemn assertions of the certainty of a future event.

b. In the first person, *shall* has, from the early ME. period, been the normal auxiliary for expressing mere futurity, without any adventitious notion. (*a*) Of events conceived as independent of the speaker's volition. (To use *will* in these cases is now a mark of Scottish, Irish, provincial, or extra-British idiom.)

(*b*) Of voluntary action or its intended result. Here *I* (*we*) *shall* is always admissible exc. where the notion of a present (as distinguished from a previous) decision or consent is to be expressed (in which case *will* must be used). Further, *I shall* often expresses a determination insisted on in spite of opposition, and *I shall not* (colloq. *I shan't*) a peremptory refusal.

In the 16th c. and earlier, *I shall* often occurs where *I will* would now be used.

c. In the second person, *shall* as a mere future auxiliary appears never to have been usual in affirmative or negative senses (exc. in the uses treated under 9 b and 11); but in categorical questions it is normal: e.g. '*Shall* you miss your train? I am afraid you will.'

d. In the third person. *Obs.* (superseded by *will*) exc. when another's statement or expectation respecting himself is reported in the third person, e.g. 'He says he shall not have time to write.' (Even in this case *will* is still not uncommon, but in some contexts leads to ambiguity; it is therefore preferable to use *he shall* as the indirect rendering of *I shall*.)

9. In the idiomatic use of the future to denote what ordinarily or occasionally occurs under specified conditions, *shall* was formerly the usual auxiliary. In the second and third persons, this is now somewhat formal or rhetorical; ordinary language substitutes *will* or *may*. Often in antithetic statements coupled by an adversative conjunction or by *and* with adversative force.

10. In hypothetical, relative, and temporal clauses denoting a future contingency, the future auxiliary is *shall* for all persons alike. (Where no ambiguity results, however, the present tense is commonly used for the future, and the perfect for the future-perfect; the use of *shall*, when not required for clearness, is apt to sound pedantic.)

† Formerly sometimes used to express the sense of a present subjunctive.

e. In statements of a former likelihood, unlikelihood, expectation, hope, fear, etc.

In present usage the rules for the choice of the auxiliary are the same as apply to the future tense (see 8). Until the middle of the 19th c., however, *should* was common in this use in the second and third persons, where *would* is now normal.

15. Forming with the inf. a substitute for the pa. t. indic. (The perf. inf. was often substituted for the pres. inf. merely in order to express the notion of past time more unambiguously. *Obs.* exc. *dial.*

The corresponding use of *shall* (= G. *soll*, 'is said to') is not evidenced in Eng., the OE. instances alleged by Bosw.-Toller having apparently a different meaning.

*** *The past tense* should *with modal function.*

As with other auxiliaries, the pa. t. (orig. subjunctive) of *shall* is often used to express, not a reference to past time, but a modal qualification of the notion expressed by the present tense. Where in addition the notion of past time is to be expressed, this can often be effected by the use of the perf. instead of the pres. inf. (though sometimes this produces ambiguity); the temporal notion may however be merely contextually implied, and in that case the pa. t. has the appearance of having both functions (temporal and modal) at once.

18. In statements of duty, obligation, or propriety (originally, as applicable to hypothetical conditions not regarded as real).

This conditional form of expression was from an early period substituted for the unconditional *shall* in sense 2, and in mod. E.g. the pres. tense in this use is obs., and *should* = ought to.

b. When the pres. tense of the principal vb. would be used if the hypothesis were accepted. (Where the pa. t. or the perf. would be used, *should* is followed by the perf. inf.)

In this use the combination of *should* with inf. forms a periphrastic past subjunctive: thus 'I should be' = the archaic 'I were'. Similarly with perf. inf.: 'Then I should have been' = 'then had I been'.

The choice between *should* and *would* follows the same rules as that between *shall* and *will* as future auxiliaries, except that *should* must sometimes be avoided on account of liability to be misinterpreted as = 'ought to' (sense 18). In present Eng. *should* occurs mainly in the first person; in the other persons it follows the rule for *shall* in 8 c, d.

c. With verbs of liking, preference, etc., *should* in the first person (and interrogatively in the second) is regarded as more correct than *would*, though this is often used.

In the third person *should* is used only in indirect speech (when *he* represents *I*); uses like quot. 1862 are abnormal.

The forms *I should have liked to (see)* and *I should like to have (seen)* are alternative ways of adding the temporal notion to the modal sense of *should*. Another form, sometimes met with, but certainly faulty, is *I should have liked to have (seen)*.

1779 Boswell *Johnson* (1904) II. 308 Should you not like to see Dublin, Sir? 1785 Trusler *Mod. erroneous use. 1883 L. Oliphant *Altiora Peto* I. 8, I should much preferred to have seen you there.

d. The original conditional notion is obscured in the phrases *It should seem* (see Seem *v.* 7 f); *one should think* (now somewhat *arch.* and perh. sometimes interpreted in the sense of 18). Similarly *I should think* (*suppose*, etc.) = 'I am inclined to think (suppose, etc.)'; also *colloq.* as a strong affirmation in reply to a tentative suggestion, e.g. 'I should (rather) think he *did* object'.

In the last phrase (as used idiomatically), *would* is never substituted; in the second person the phrase is used only in questions, and in the third person only in oblique narration.

[A Com. Teut. str. verb, the original conjugation of which is found unaltered only in OE., OFris., OS., and Gothic, while in the other Teut. langs., and in Middle and Modern English, the primitive flexional forms have been more or less completely replaced by analogical new formations. OE. *scieppan*, *scóp*, *scapen* corresponds to OFris. **skeppa*, *skóp*, *eskepen* (WFris. *skeppe*, *skoep*, *skepen*), OS. **gisceppian*, *-scóp* (*scuop*), **-scapan*, Goth. *gaskapjan*, *-skóp*, *-skapans*: the sense in all these langs. is 'to create', occas. 'to fashion'. In early ME. a new pres.-stem *shape* was formed on the analogy of the pa. pple., and after the 14th c. completely took the place of the older *sheppe*, *shippe*. The str. pa. t. survived into the 14th c. (in Sc. still later), but in ME. two different weak formations are also found: *shupte* (ü) from the original present-stem, and *shapide* from the altered form *shape*. In the pa. pple. ME. similarly developed two distinct weak forms, of the types *schept* and *shaped*. From the 16th c. onwards, *shape* has been a 'regular' weak verb (pa. t. and pa. pple. *shaped*), though the pa. pple. *shapen* still survives in archaizing use. The verb has been influenced in sense-development by Shape *sb.*, of which it is apprehended as a derivative.

In continental Teut. the changes in conjugation were similar to those that took place in ME.; in addition, a cognate verb repr. an OTeut. type **skapōjan* became in some dialects coincident in form with the verb represented by the OE. and Gothic forms above. Further, German and Du. have from their earliest known periods had a verb meaning 'to draw water', identical in form (and perhaps in etymology) with the verb meaning 'to create'; in the older stages of those langs. all the conjugational varieties occur with both meanings, but subsequently the verb meaning 'to create' and that meaning 'to draw water' came to be distinguished throughout by difference of inflexion. The forms are as follows:—OFris. **skeppa*, *skóp*, *eskepen* to create, OS. *giscóp* pa. t., created, *sheppian* wk., to draw water; Du. *scheppen*, *schiep*, *geschapen* to create, *scheppen*, *schepte*, *geschept* to draw water; OHG. *scepfen*, *scuof*, *giscaffan*, also *scaffan*, *scafta*, *gascaft* to create, to draw water, also *scaffôn* wk., to form; MHG *schepfen*, *schepfte*, *geschepft*, also *schaffen*, *schuof*, *geschaffen*, and occas. *schaffen*, *schaffte*, *geschafft* to create, to do, to draw water; mod G. *schöpfen*, *schöpfte*, *geschöpft* to draw water, earlier also to create (cf. *schöpfer* creator); *schaffen*, *schuf*, *geschaffen* to create; *schaffen*, *schaffte*, *geschafft* to do, procure; ON. *skepja*, *skóp* and *skapða*, *skapt-r*, also *skapa*, *skapaða*, *skapað-r* to shape, make, ordain; Sw. *skapa*, Da. *skabe* to create, make, shape.

The ultimate etymology is obscure. Some scholars have suggested that the original sense is 'to draw (water) from a source', and that the senses 'to create', 'to ordain' are developed from this. Others regard **skapjan* to draw water (which is related to OTeut. **skapo-*, OS. *scap*, OHG. *scaf*, mod.G. *schaff*, vessel, bucket) as a distinct word from **skapjan* to create, ordain. For other derivatives of the Teut. root **skap-* see Shaft *sb.*[1], -ship; outside Teut no cognates are known, unless the root **skap-* be an altered form of **skab-* (=pre-Teut. **skabh-*): see Shave *v.*]

I. To create, fashion, form.

†1. *trans.* To create; in later use, to form, fashion (said of God or Nature).

From the beginning of the 14th c. there are indications that the verb in this use was sometimes apprehended as meaning 'to form, fashion, give shape to', and in the 16th c. the verb, though still used of God, would prob. have been regarded as corresponding to *formare*. In the 17th c. it was felt to be an inappropriate word to apply to God: cf. 'God makes, and the Tailor shapes' (Bulwer *Anthropom.* 256).

Shark (ʃāk), *v.*[1] Also 7 **sharke**; and see Shirk *v.* [Of uncertain origin.

It seems likely that two different words have been more or less confused from the time of the earliest examples: the one (which has the variants *sherke*, *shirke*: see Shirk *v.*) Shark *sb.*[2], and the other f. Shark *sb.*[1] The senses naturally resulting from these derivations respectively are so nearly allied, and the use with mixed notions is so frequent, that the two verbs cannot be distinguished.

Skeat conjectured that *shark* vb.[1] (which he regarded as the source, not the derivative, of the two sbs.) was a north-eastern Fr. *chercquier* = F. *chercher* to seek, orig. to go about to find. He refers to the phrase '*corcher le broust*, to hunt after feasts, to play the parasite or smell-feast' (Cotgr.), and to the similar It. '*cercare del pane*, to shift for how to live' (Torriano). In view of the senses of this verb and those of Shark *sb.*[2] (parasite, one who lives by shifts), the citation of these phrases gives striking plausibility to Skeat's hypothesis, which would also account for the divergent forms *shark*, *sherk*, *shirk*. But the sense in which the Fr. verb is assumed to have been adopted is merely contextual in the phrase quoted; further, the importation of the Fr. word in a dialectal form at the end of the 16th c. would be surprising, and if (which is unlikely) the adoption took place early the initial sound would normally be *ch*, not *sh*.]

1. An article of dress worn by Orientals (commonly as a scarf, turban, or girdle), consisting of an oblong piece of a material manufactured in Kashmir from the hair of the Tibetan 'shawl-goat' (see 3 b).

H. Lavard *Autobiog.* I. iii. 145 A thick shawl in endless folds round their waists.

2. As the name of an article of clothing worn in Europe and the West, chiefly by women as a covering for the shoulders or, sometimes, for the head; originally applied to the imported 'Cashmere shawl' (= sense 1 above: see Cashmere), but in later use extended to denote an oblong or square piece of any textile or netted fabric, whether of wool, silk, cotton, or mixtures of these.

The imported 'Cashmere shawls' had usually elaborate patterns, in which a prominent feature was a peculiar ornament shaped something like a pear, with the narrow end continued into a curve. These patterns are often imitated in 'shawls' of European manufacture.

The use of the shawl as an outdoor garment is now confined to the poorer classes.

See also Sh', Sh-. [Of difficult etymology; but prob. an altered form of the OE. fem. dem. pron. *sīo, sēo, sīe*: see The *dem. pron.* A. I b.

It would appear that in some dialects of late OE. the diphthong in this word underwent a change of stress, the older pronunciations (*sīo*) and (*sīe*) being replaced by (*syð*) and (*syð*). The latter of these variants is represented by the spelling *ȝe* of the 13th c.; and the phonetic development so far is exactly parallel to that of the OE. fem. pers. pron. *hīo, hēo, hīe* (see Heo), which in the 13th c. was pronounced in some dialects (*hyð*, *hyð*), as is shown by the written forms *ȝho, ȝhe*. As the combination (*sy*) is acoustically close to (*ʃ*), and more difficult (according to English habits of articulation) to produce, it is not surprising that (*syð, syð*) became (*ʃð, ʃð*), these being the pronunciations expressed by the written forms *sce* (midland, *c* 1150) and *sco, scho* (northern, *a* 1300).

It has been objected to this view that in ONorthumbrian the fem. sing. of the demonstrative was not *sīo, sēo*, but *Sēo, Bīo*. Instances of *sēo, sīo* are, however, found in the Lindisfarne Gospels and the glosses to the Durham Ritual and

Hymnarium; and the extant remains of the dialect represent a very small portion of the Northumbrian territory.

With regard to the substitution of the demonstrative pronoun for the original pers. pron., it may be remarked that the phonetic development of various dialects had in the 12th and 13th c. rendered the pronouns *he* (masc.) and *heo* (fem.) almost or wholly indistinguishable in pronunciation. There was therefore where these dialects were spoken a strong motive for using the unambiguous feminine demonstrative instead of the feminine personal pronoun. Further, the districts in which *she* or *sho* first appears in the place of *heo* are marked by the abundance of Scandinavian elements in the dialect and place-names; and in Old Norse the dem. pron. (of all genders) is often used as a personal pron. It is also noteworthy that in OS. and OHG. the fem. pers. pron. nom. sing. was *siu* (mod.G. *sie*, Du. *zij*), corresponding to OE. *sēo* (the oblique cases, and the masc. and neut. in the sing., being f. the stems *hi-*, *i-*); and in OFris. *se* 'she' occurs beside *hia*.

The conjecture that *she* represents the ON. *sjá* this (nom. sing. masc. and fem.) is untenable: the initial (ʃ) is sufficiently accounted for otherwise, and the vowels do not agree. It is however possible that the change from the falling to the rising diphthong in the development both of *hēo* and *sēo* may be due to Scandinavian influence, as in ON. the Germanic *eu* and *iu* became rising diphthongs.

Some scholars have maintained that *she* and its dialectal variants descend directly from the pronunciations (hyé, hyə) of Heo (referred to above); the contention being that (hy) might naturally develop into (ʃ). This development has occurred in some Norwegian dialects, and it is illustrated by the proper names *Shetland* and *Shapinshay* from ON. *Hjaltland* and *Hjalpandisey*. But no instance of it has been pointed out in English of any period, and unless this can be done, the proposed etymology does not appear to have a claim to consideration.

The ə type (to which the mod. literary form belongs) is in origin East Midland, while the β type is originally northern.]

1. Originally (and still *Sc.* and *dial.*) = Scissors. In later use commonly applied to scissors of large size, and to other cutting instruments which similarly operate by the simultaneous action of two blades on opposite sides of the material to be cut.

The various kinds of shears fall into two principal classes: those which are worked in the manner of scissors, and those in which (as in ordinary sheep-shears) the bringing together of the blades is effected by pressure on their stems between the blades and the arched spring by which the stems are connected. Shears of the latter class have now sometimes three or more blades instead of two.

Often with defining word indicating the purpose for which the instrument is intended or some peculiarity of its construction, as *bar-shears, clipping shears*, etc. q. v. under the first element; also Sheep-shears.

a. in pl. form, with plural construction, either in sing. or plural sense. When qualification by a numeral or an indefinite article is required, *pair of shears* is used.

II. In scientific uses.

6. a. *Physics* and *Mech.* (*a*) A kind of strain consisting in a movement of planes of a body that are parallel to a particular plane in a direction parallel to a line in that plane through distances proportional to their distances from that plane. (*b*) The stress called into play in a body which undergoes this kind of strain.

1850 [see SHEAR *v.* 9]. 1858 RANKINE *Man. Appl. Mechanics* § 103. 87 Planes of Equal Shear, or Tangential Stress. 1867 THOMSON & TAIT *Nat. Philos.* I. § 171 This kind of strain is called a simple shear. 1869 H. MOSELEY in *Lond. etc. Philos. Jrnl.* XXXVII. 230 The unit of shear being the pressure in lbs. necessary to overcome the resistance to shearing of one square inch. 1883 LODGE in *Nature* XXVII. 328 The bound ether inside a conductor has no rigidity; it cannot resist shear. 1888 GLAZEBROOK & SHAW *Pract. Physics* 139 The body is said to undergo a simple shear. 1888 *Lockwood's Dict. Mech. Engin.* s. v. *Shear*, A bar is said to be in shear when it is subject to shearing stress. 1894 TODHUNTER & PEARSON *Hist. Th. Elasticity* II. II. 386 The authors [Thomson & Tait] term it a simple shear. This is unfortunate, for that word was introduced by George Stephenson to denote the transverse stress in rivets, and has been consistently used in this sense of stress by Rankine and the majority of engineers since. Its present confused use partly for stress and partly for strain has been avoided in our own work by the introduction of the term slide for shearing strain. 1906 LOVE *Math. Th. Elasticity* (ed. 2) 532 The word 'shear' has been used in the sense attached to it in the text by Kelvin and Tait. Rankine proposed to use it for what has been called 'tangential traction'.

b. *Geom.* The transformation produced in a plane figure by motion in which all the points of the figure describe paths parallel to a fixed axis and proportional in length to their distance from it. (See quot.)

1885 O. HENRICI *Projection* in *Encycl. Brit.* XIX. 797/2 Such a transformation of a plane figure is produced by a shearing stress in any section of a homogeneous elastic solid. For this reason Sir William Thomson has given it the name of shear.

7. *Geol.* Applied to the operation of transverse compression on a mass of rock, resulting in alteration of structure or breach of continuity. Also Comb. *shear-plane, -zone* (see quots.).

1888 TEALL *Brit. Petrogr.* 447 *Shearing*, differential movement in a rock-mass. When the movement is concentrated along a plane, this plane is said to be a shear-plane. 1889 O. FISHER *Physics Earth's Crust* xx. (ed. 2) 268 The same amount of shear, which at one locality produces crumpling, may in another..produce schistosity. 1903 E. W. CLAYPOLE in *Amer. Geol.* Aug. 81 (*Cent. Dict.* Suppl.), Some [strata] are completely concealed by others that have been forced over them along shear-planes developed by the enormous pressures to which they have been subjected. 1911 J. F. KEMP *Min. Deposits* in *Encycl. Brit.* XVIII. 507/2 Sometimes..strains of compression have been eased by local crushing along comparatively narrow belts without appreciable..displacement of the sides such as would be required by a pronounced fault. The word shear-zone has become quite widely used in recent years as..applicable to these cases.

Shear (ʃiəɹ), *sb.*[3] Also **sheer**. [Of uncertain origin; not easily identified with SHEAR *sb.*[1] or *sb.*[2]] The bar, or one of the two parallel bars forming the bed of a lathe, on which the poppets slide. Also *attrib.*

1812 P. NICHOLSON *Mech. Exerc.* 364 The bed [of a foot lathe] consists of two parallel parts, called by some shears. 1869 RANKINE *Machine & Hand-tools* Pl. N 1, Two cast iron end standards..upon which is laid the long massive cast iron shear-piece. 1873 J. RICHARDS *Wood-working Factories* 160 The shear, or lathe frame..can be made of wood. 1875 KNIGHT *Dict. Mech.* 1262 The *bar-lathe* has a single beam or shear, generally of a triangular shape. *Ibid.*, The *bed-lathe* is the usual form, and has two parallel shears. *Ibid.*, The bed, sheers, cheeks, sides, on which the puppets slide.

Chiefly in Ireland and Scotland: A shop or house where excisable liquors are sold without a licence (see quot. 1903); any low wayside public-house.

(redupl.): OE. *sc(e)ádan, scéadan*, pa. t. *sc(e)ád, scéad*, pa. pple. *sc(e)adden* (? *scéaden*), corresponds, either directly or with consonant-ablaut, to OFris. *skéda, skétha* wk. The original OE. *sc(e)ádan* would normally yield (midland and southern) ME. and mod.E. *shode*, which is occas. found in writings from the 12th to the 15th c. It would appear that by the side of the original form OE. had (presumably in certain districts, but evidence is lacking for localization) an altered form *scéadan*, with change of rising into falling diphthong; from this the modern *shed* (ʃed) descends by a development parallel to that of *bread, dead*, from OE. *bréad, déad*.

The OE. verb retained its strong conjugation in WS., but in Northumbrian occurs only as weak (usually with forms *-scéadade, -scéadad* on the analogy of the *ō* stems; rarely contracted *scéadde*). In early ME. there were forms like *sched* pa. t., *schedden* pa. pple., representing the original strong conjugation; forms like *schadid*, representing the wk. forms of OE.; and forms like *schédde, schédd*, prob. not repr. ONorthumb. *scéadde*, but new formations due to the analogy of vbs. like *rede* (read), *léde* (lead), etc. The mod. pa. t. and pa. pple. *shed* are prob. to be regarded as representing the last type of conjugation, which was by far the most frequent in ME.]

The Gothic *ibnaskaunis* like-formed, *gubaskaunei* likeness of God, suggest that the word may originally have meant 'having (a certain) appearance'. For the development of the eulogistic sense, cf. *sightly*, *shapely*, L. *forma* form, beauty, *formosus* beautiful.

In English (and app. to some extent in OHG. and OS. where it glosses *lucidus*, *splendidus* etc.) the sense was influenced by association with the root of SHINE *v.* In early examples it is often difficult to determine whether the sense is merely 'beautiful', or whether there is some added notion of 'shining, bright'.

The form *scone* in Ormin, which implies the pronunciation (*skôna*), is unexplained. The identically written form in Layamon, however, seems to be merely an instance of the practice, common in 12–13th c. texts, of writing *o* for *eo*.]

2. Bright, shining, resplendent.

In early use this sense may have been merely contextual, the adj. being applied in the sense 'beautiful' to objects (e. g. heavenly bodies, jewels, metals) the beauty of which is dependent on their brightness. In later use, owing to association with SHINE *v.*, SHEEN *sb.*¹, the sense 'shining' is felt as primary.

Sheer (ʃiəɹ), *v.*[2] *Nat.* Forms: 7–8 shere, 7 shear(e, share, 7– sheer. [Perh. a use of SHEAR *v.*; but the development of the sense is obscure.

In MLG. and mod.LG., MHG. and mod.Ger., mod.Du. (but not MDu.) the vb. *scheren* (etymologically identical with SHEAR *v.*) often occurs intr. and refl. with the sense to withdraw, depart, 'be off' (coincident with sense 1c below). This sense is commonly regarded by lexicographers as developed from the sense 'to divide'. The word in continental Teut. does not seem ever to have been in use as a nautical term, so that the common view that the Eng. vb is of LG or Du. origin is not convincing. The correspondence between the senses below and the Ger. and Du. senses above-mentioned is not sufficiently exact to warrant the assumption that the course of development has been parallel.]

Perhaps f. ME. *shote*, Shot *sb.*[2] = cable of two ropes spliced together, but the difference of form (*shott* and *shute*) in quot. 1497 makes this doubtful. With regard to the generally accepted derivation from Shoot *v.* ('an anchor that is shot out'), the formation would be abnormal, it is not supported by the majority of the *α*-forms, nor is it clear why any anchor in particular should be so designated.]

Shelf (ʃelf), *sb.*[2] [Of obscure origin.

The identity of sense with SHELF[1] (recorded a century arlier) suggests that the two words may be in some way tymologically connected. The unexplained variation between *f* and *f* seems to have a parallel in the OE. *scylf* and *cylf*, both used to gloss *scopulus* and *murex* sharp rock, nd in SCALP *sb.*[2] bed of oysters (cf. 2 below), which has the ariants *scalfe*, *scalph*. It is not impossible that the word ay descend from the OE. *scylf*, *scylp*, in some unrecorded ense. Some of the later uses show influence from SHELF *sb.*[1]]
